

Product End of Life Notification

Date: August 26, 2020

Product description / part numbers effected:

Wire Wrapping Services - Wire wrapped circuit board and backplane assemblies based on customer provided specifications for point to point connections, most typically done using kynar wire. For specific part numbers affected please contact LCR customer service with the LCR issued part number or the customer specific number.

Last time buy date: June 30, 2021

Last time ship date: December 31, 2021

Reason for end of life:

LCR has made the decision to no longer offer wire wrap products due to the steady decline in demand for wire wrap boards in favor of printed circuit designs now used for backplane interconnectivity. This transition from old to new technology has resulted in limited support and availability of tooling and equipment necessary in the manufacturing of wire wrap boards.

Alternative solution

Contact LCR to discuss options for tranistioning from wire wrap technology over to printed circuit designs.
